New York, June 14.—R. G. Dun & Co.'s weekly review of trade, which issues to-morrow, w.i.' say:

It is no longer a question whether bushess improves. Not for a long time have nor reports from all parts of the country been so uniformly bavorable. The daily average of bank clearings in June is 248 per cent. larger than last year, though II.4 per cent. less than in 182. The nuck potent influence has been receipts of more favorable advices regarding growing crops. Labor troubles are getting out of the way, wages in many establishments are rising and the iron industry in I now leading, there is general improvement in manufacturers. Monetary conditions also help. The time draws near when a good crop of exports will bring gold hither, and though foreign oberations in stocks and bonds have been insignificant this week, the effect of the previous transaction, has not been exhausted. Much diminished receipts of mobey from the interior indicate better employment in humaness, and especially at the west, and the volume of commercial loans steadily rise and is now fair for this spasson even in the a good year. The output of high ron June 1 was but a triffe larger than May 1–187,224 tons, against 186,554 a mouth ago, and frage a year ago. The advance in prices continues, Bassemer pig reaching \$12.56 and Grey force \$18.55 at Pittsburg, and changes in 81 ron products show an advance of \$5 per cent, this mouth and IL3 per cent, from the lowest point in February. For this conservative industry the rise of 3 per cent, this mouth and IL3 per cent, from the lowest point in February. For this compared with \$5 per cent, in cotton, \$5 per cent, in heather, \$5 per cent, in cotton, \$5 per cent, in heather, \$5 per cent, in cotton, \$5 per cent, in heather, \$5 per cent, in cotton, \$5 per cent, in heather, \$5 per cent, in cotton, \$5 per cent, in heather, \$5 per cent, in cotton, \$5 per cent, in heather, \$5 per cent, in commerce heather \$6 per cent, and \$7 in Canada against \$6 last year.

New York, June 14.—Bradstreet's tomorrow will say: The recent check to
the activity in general trade, taking the
country as a whole, which followed the
severe and unusual trosts of the close
of May, has begun to register itself in
relatively fewer upward spuris of prices
for staples and moderately smaller totails of bank cleavings. The terral crop
scars which followed the frosts frightened foreigners out of Wall street for the
moment, and since then the speculation
exchange, and leading commercial houses
have been busy trying to determine futire yelues on the basis of present conditions.

the values on the basis of present conditions.

The exc.ption in the halt is found in the remarkable exhibition of strength by fron and steel which, without special orders from railroad and other large consumers, have again advanced all along the fine. Resorts of wheat, thour included as wheat, from both coasts of the linited States and Canada show a surprising decrease, the total amounting to only 1,73,731 oushels against 2,90,000 hushels last week. Boston, Montreal and Baitimore report very much smaller shipments of wheat than last week, and Newport News much less flour. This week's lotal wheat and flour shipments appear to have been the smallest since the second week in June, 1891. There have been few changes in the trade siluation at the points, but these are in the direction of improve 1 demand, principally in dry goods, shoes, hats and other seasonable rouds, with the prospects for a good fall trade should the crop prospects remain as at prezent.

BANKING CHANGES.

San Prancisco, June 14. The bank of Sisson, Crocker & Co. is about to retire from business, and will be consolidated with the Crocker-Woolworth National Wik, the connection of the two institutions being inlimate. The reason for the learnest of the bank of Sisson, Crocker & Co. is lack of commercial business. The capital of the Crocker-Woolworth National bank will remain at one million Lollars.

Judge Dey will represent the furniture company at the hearing. It is supposed that Expert Anderson is very nearly through with his special auditing He has been working now for some months and has accumulated a statek of papers which is a foot thick. Mr. Anderson was auditing the onyx yesterday, being assisted by a young man with a tape line He meanward up all the material in the building.

Hitherto the investigation has been conducted on a sort of one-sided basis. Of course Joe Morris has cross-questioned many of the witnesses until they did not know where they were at, but now the furniture matter has been reached some of the liveliest kind of fun may be looked for. In rebuttal of the testimony of a startling nature, and an all around view indicates that sensationalism will run rife. Swiney is a gocompanied by Mrs. Swiney, and Weary has his little son with him. They are evidently here to stay awhile.
